

RAINBOW
INTERNATIONAL SCHOOL UGANDA

Year 1 Handbook for Academic Year 2017 - 2018

The International Primary Curriculum (IPC) in Rainbow International School covers all subjects apart from English and Mathematics. It focuses on knowledge, skills and understanding in three areas – subjects, personal goals and international mindedness.

English and Mathematics are taught using internationally best practice and is in line with the Primary Frameworks for English and Mathematics devised from the English National Curriculum.

We hope this Curriculum Outline will give you an understanding of the learning covered during the year.

We wish your child a successful and happy year!

previous school experiences.

The learning process, is often practical, providing many different opportunities to explore and consolidate a given concept. A major part of that process is repetition and consolidation. We discuss the learning with the children in terms of them Beginning, Developing or Mastering a new skill.

The children will be introduced to new activities and concepts which will require a greater concentration and increasing independence.

Children learn in whole-class, group, paired and individual sessions. During some learning, there will be opportunities for mixed groups across the year group. Each child is encouraged to reach their potential.

Our Learning Focused School

At Rainbow International School Uganda (RISU) we talk about what the children are learning as opposed to what they are doing.

Each child is an individual and we are interested in how they progress and achieve rather than attainment. We assess children throughout the year to measure their learning; the change that occurs in their knowledge, skills and understanding as a result of the learning experiences they have.

Within RISU we are a learning focused community. Both the staff and children continually develop their learning, this in turn brings the school community together.

Teaching staff in Year 1:

Each class in the Primary section of Rainbow International School has a full time class teacher and a full time teaching assistant;

CLASS	CLASS TEACHER	TEACHING ASSISTANT
1RN	Ms Rose Namujuzi	Ms Diana Atugonza
1MG	Ms Mercy Gachanja	Mrs. Milly Mutebi

International Mindedness

At RISU we strive to educate and develop children into 21st Century Learners - internationally minded individuals who respect and celebrate diversity.

start developing a global awareness and gain an increasing sense of themselves, their community and the world around them, as well as inspiring positive action and engagement with global issues.

In addition to this, each thematic IPC unit of work includes specific tasks related to International as a subject in its own right, as well as encouraging schools to explore the unit from the perspectives of both the 'host' country (the country 'hosting the school') and 'home' country (the country which children call 'home').

Our definition of International Mindedness here at RISU is;

***International Mindedness** is the ability to respect and value the cultural and linguistic diversity of our school community, by developing an understanding through learning about, from and with each other.*

Principles of Learning

At RISU we believe learning is most effective when learners:

- invest in the value of learning
- are actively involved
- are given a safe space to rehearse
- can use the appropriate subject vocabulary or key words
- can use the language of learning and demonstrate their learning in a variety of ways
- are given the opportunity to reflect
- can transfer the new into a variety of different situations
- negotiate risk
- make meaningful choices

The Personal Goals are at the centre of the qualities we teach in the classroom, and we want our children to display to be the most successful learners possible.

Adaptability:

Know about a range of views and cultures, cope with unfamiliar situations and explore new roles, ideas and strategies.

Communication:

Use a variety of tools and technologies to aid in communication, make their meaning plain using verbal and non-verbal communication and communicate in more than one language.

Cooperation:

Work alongside and with others, understand different roles in a group and be able to adopt different roles.

Enquiry:

Ask and consider searching questions, plan and carry out investigations and collect reliable evidence.

standpoints.

Resilience:

Stick with a task, cope when unsuccessful and try again.

Respectfulness:

Know about the varying needs of people, living things and the environment. Show respect for people, living things and the environment.

Thoughtfulness:

Use a range of thinking skills to solve problems, consider alternative points of view, reflect on what they have learned and identify their own strengths and weaknesses.

As well as the personal goals we strive for our children to be independent, effective communicators and self confident. Children at RISU are given every opportunity to develop into creative and critical thinkers, and instill a love of learning to become life-long learners

Knowledge, Skills and Understanding

At RISU we believe that differentiating between knowledge, skills and understanding is crucial to the development of children's learning. It is important that we all know the differences between them;

Knowledge:

The children continually increase their knowledge as it is self-contained information. The children can express this in "I now know that"

Skills:

The children are actively developing their skills. This is a continuing development in which the children go through the stages of "Beginning, Developing and Mastering and beyond". The children express this in "I am now able to"

Understanding:

By continually using their skills and knowledge this will lead to improved understanding. Children will be given reflection time to consolidate their understanding.

Assessment for Learning

Through Assessment for Learning, teachers are able to deepen and further children's learning rather than just measure it, and support children to become active, lifelong learners.

Through the Assessment for Learning process children will be aware of:

- What they are going to learn
- How they will recognise the learning that has taken place

Assessment for Learning consists of five basic elements:

- Talking Partners
- Shared learning goals
- Effective questioning
- Self and peer evaluation
- Effective feedback

In the classroom this will be seen by:

- Children sitting with their talking partners
- Learning Goals shared with children at the beginning of lessons
- Questions used to stimulate children into higher order thinking, and a variety of questioning techniques used
- The ‘Steps for Success’ will be used at the beginning and end of learning tasks, so that children can assess themselves or a peer against these
- All feedback is given to highlight children’s achievements and provide support and suggestions for how to progress in their learning, whether this is verbally or written

Assessment overview for Year 1

Baseline	Term 1	Term 2	Term 3

Curriculum Subject overview

<u>Subject</u>	<u>Lower Primary (Y1+Y2)</u>
<p><u>English</u> Two sessions of 15 mins of handwriting 1 hour of guided reading (split into smaller sessions) One session of 30 mins of spelling 4 hours English lessons</p>	<p>6 hours</p>

<u>Mathematics</u> One session of 30 mins problem solving 4 hours 30 mins Maths lessons	5 hours
<u>IPC</u> One session of 45 mins Personal Goal focus and/or International Mindedness focus per week	5 hours 45 mins (or up to 8 hours if integrated with English)
<u>Computing</u> One session of 1 hour	1 hour
<u>French</u> One session of 30 minutes One session of 1 hour	1 hour 30 mins
<u>Library</u> 1 session of 30 minutes	30 mins
<u>Music</u> One session of 30 minutes One session of 1 hour	1 hour 30 mins
<u>PE</u> One session of 30 minutes One session of 1 hour	1 hour 30 mins
<u>Swimming</u> One session of 30 minutes	30 mins
<u>Total:</u>	23 hours 15 mins

Primary Framework for English and Mathematics

Regular and effective daily English and Mathematics (Maths) teaching introduces children to new learning and to new ways of learning. Children will build on and consolidate their learning through practical work, practice and the opportunity to use their learning to solve problems and puzzles. Teachers provide planned opportunities for children to develop and apply their learning in other areas of the curriculum and beyond. Linking Literacy and

children to appreciate the role that these aspects of learning play in their everyday lives.

English

During Year 1, teachers should build on work from the Early Years Foundation Stage, making sure that pupils can sound and blend unfamiliar printed words quickly and accurately using the phonic knowledge and skills that they have already learnt. The understanding that the letter(s) on the page represent the sounds in spoken words should underpin pupils' reading and spelling of all words.

Children will also develop the skill of blending the sounds into words for reading and establish the habit of applying this skill whenever they encounter new words. This will be supported by practice in reading books consistent with their developing phonic knowledge and skill and their knowledge of common exception words. At the same time they will need to hear, share and discuss a wide range of high quality books to develop a love of reading and broaden their vocabulary.

Writing during Year 1 will generally develop at a slower pace than their reading. This is because they need to encode the sounds they hear in words (spelling skills), develop the physical skill needed for handwriting, and learn how to organise their ideas in writing.

ENGLISH UNITS TAUGHT WITHIN YEAR 1	
Term 1	Phase 1-3 Daily Phonics Stories with familiar settings Labels, lists, signs and captions Pattern and Rhyme Stories from a range of cultures/stories with predictable and patterned language
Term 2	Instructions Using the senses Stories from a range of cultures/stories with predictable and patterned language Recounts , dictionary Poems on a theme The story of Jake and Bones
Term 3	Traditional and Fairy Tales Information texts Stories about fantasy worlds Recounts on a theme

Maths (Years 1 & 2)

The principal focus of mathematics teaching in Key Stage 1 (Years 1 & 2) is to ensure that pupils develop confidence and mental fluency with whole numbers, counting and place value. This involves working with numerals, words and the four operations, including with practical resources (for example, concrete objects and measuring tools).

related vocabulary. Teaching also involve using a range of measures to describe and compare different quantities such as length, mass, capacity/volume, time and money.

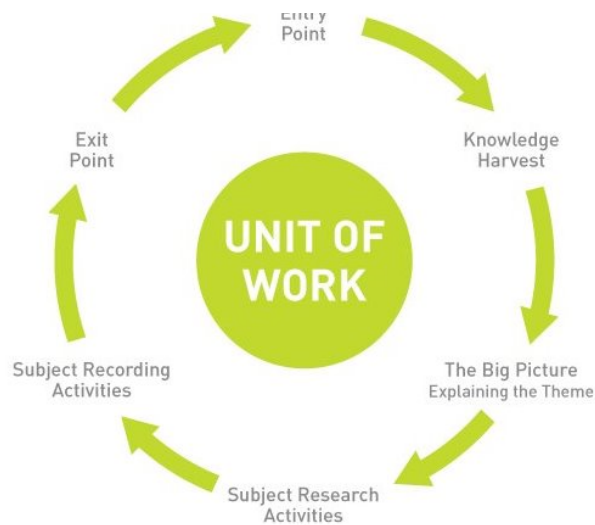

By the end of Year 2, pupils should know the number bonds to 20 and be precise in using and understanding place value. An emphasis on practice at this early stage will aid fluency.

MATHS UNITS TAUGHT WITHIN YEAR 1	
Term 1	Number and place value Mental addition and subtraction Mental multiplication and division Geometry: properties of shapes; Statistics Problem solving, reasoning and algebra Measurement
Term 2	Number and place value Mental addition and subtraction Problem solving, reasoning and algebra Mental multiplication and division Geometry: Properties of shapes
Term 3	Fractions ratio and proportion Problem solving, reasoning and algebra Measurement Mental addition and subtraction Number and place value Statistics

International Primary Curriculum (IPC)

In Year 1 the children start to work towards the subject, personal (personal goals) and international (international mindedness) learning goals for Key Stage 1, building on their previous experiences. We make cross-curricular links wherever possible to enhance children's understanding, especially in English.

There is a distinct learning process with every IPC unit, providing a structured approach to make sure that children's learning experiences are as stimulating and rigorous as possible;

The children of Year 1 learn within their own class but also across the year group. The IPC is a fantastic learning tool to allow children to learn from, by and with each other.

The IPC units for this year are:

1. Flowers and Insects
2. Buildings
3. Sensational
4. Media Magic
5. From A to B

Personal and international learning are integral to the IPC and weave their way throughout our units of work (previously highlighted through the Principles of Learning and International Mindedness).

The personal goals of the IPC are integral to the whole learner. These personal goals include being a resilient and cooperative learner, having effective communication and teamwork skills, being moral, thoughtful and respectful, and developing inquisitive and adaptable learners.

For the international learning goals; each IPC unit has embedded within it, across the different subjects, learning-focused activities that help children start developing a global awareness and gain an increasing sense of themselves, their community and the world around them, as well as inspiring positive action and engagement with global issues.

Computing

Computing has become an integral part of modern life and the ability to understand and utilise its potential are essential for the child of tomorrow. Our Computing programme offers the students opportunities to develop their skills in manipulating and presenting text, graphics and data whilst using a wide range of child-friendly and common office programmes. Keyboard skills are developed through the use of typing programmes and teacher led activities. The students are taught about creating, saving, printing and managing files. Some computing lessons are aimed at supporting the IPC units that are being studied in class. The internet is used as an important research tool and the students are taught techniques for searching, selecting, evaluating and interpreting information.

- Using programmable toys
- Filming the steps of a recipe
- Illustrating an e - book
- Finding images using the web
- Producing a talking book
- Creating a card digitally
-

French

For many of our students, French is a second, third or even fourth language. Learning French offers them a deeper experience and understanding of some local cultures and the opportunity to communicate effectively in the wider community beyond school. Our curriculum for French centres on introducing and building functional speaking and listening skills with a gradually increasing emphasis on reading and writing as the student advances.

Units of learning for Year 1:

-
- Greetings/Name/Colours/Numbers
- My house/Christmas
- Fruits/pets
- Clothes/Body parts
- Transport/ days of the week

Music

Skills are developed through learning activities related to IPC and the UK National Curriculum in order to ensure the development of musical skills across the musical elements of rhythm and pulse, pitch, duration, tempo, dynamics, texture, timbre and form. Children will be encouraged to listen, evaluate and sing a range of songs from different backgrounds and cultures. The history of classical music will be taught through interactive topics developing listening, creating and performing skills. Students will be encouraged and guided to create their own music. Students will often work collaboratively in a classroom or group band setting and they will have many opportunities to develop their confidence through performing to their peers and others.

Over the course of primary, children will begin to understand basic music theory and appreciate that there are different styles and genres in music as well as identify their strengths in the sphere of music.

The music department recognizes and nurtures talent through our extra-curricular program.

Some of the units we will be studying in Year 1 music are:

- Teddy bears - exploring contrasts in music
- What's the score - exploring instruments and symbols.
- Rain Rain go away - exploring timbre, tempo, and dynamics
- Sounds Interesting - Exploring sounds
- Taking off - Exploring pitch (So mi)
- Feel the pulse - exploring pulse and rhythm (stick notation)

Physical Education (P.E.)

The Physical Education Curriculum at Rainbow International School aims to promote a healthy and active lifestyle in a safe and supportive environment.

a wide base of movement knowledge, skills and understanding. Children may work as individuals, be paired-off or take part in group activities. During co-operative, creative and competitive situations they are encouraged to use their improvisation and problem-solving skills. All children are encouraged to appreciate the importance of a healthy body and begin to understand factors that affect health and fitness.

Activities covered within Years 1 - 6 are Gymnastics, athletics/fitness, basketball, football, net/wall games and dance.

Through the above, children are encouraged to develop in the following areas:

- Gross Motor skills e.g. running, hopping, skipping, jumping, galloping etc
- Manipulative skills e.g. catching, throwing, dribbling a ball (these also develop hand/eye coordination skills)
- Postured skills e.g. bending, curling, stretching, balancing, twisting etc
- Creative skills e.g. through play, dance and movement (responding to a piece of music/poetry or solving a problem)
- Co-operative skills (team work and co-operative)
- Awareness of basic safety and hygiene practices
- The effects that exercise has on the human body

Swimming

Swimming is an essential life skill and part of the Primary P.E. curriculum. All children are expected to participate in the school's swimming programme, which aims to broadly develop a child's water confidence, coordination and safety in deep water (a life skill); develop their stroke development technique, introduce the child to water safety and develop their independent and team skills.

The programme followed at Rainbow International School are appropriate to each individual child's ability and needs.

In Year 1 and 2 we particularly focus on introduction of stroke technique, introduction to swimming in the big swimming pool through various activities which include the following:

- Collecting sunken object
- Streamlined gliding
- Playing water games
- Posture skills e.g. breaststroke position and front crawl position
- Basic safety and hygiene
- Creative skills e.g. fun swimming as they discover new things
- Competitive skills e.g. races with kickboards

ESL/SEND children within Year 1

NAME OF CHILD	CLASS	SUPPORT RECEIVING (ESL/SEND/IN CLASS/ OUT OF CLASS)	OWN LEARNING ASSISTANT ?
Johnson Halim	1MG	SEND - Out - 1 Hour	Camilla Lorika

Home Learning

Home learning tasks can play an important part in consolidating children's attainment, developing independent learning habits and involving parents in the education of their children. Children will receive learning to complete

Our guidance to home learning is;

Age	Reading and being read to Recommended time per day	Other home learning activities Recommended time per day
Y1 & Y2	Students are expected to read each night	approx. 10/15 minutes

Home learning will most often be linked to class learning, providing the opportunity to extend or reinforce taught concepts. If the home learning task is not clearly understood, or your child is struggling with a task, please contact the class teacher.

Promote a learning culture by:

- Making yourself available at home to support your child, should they need it
- Making a 'home learning area' within your home, somewhere quiet with no distractions.
- Ensuring home learning is done at home and not en-route to school
- If your child is unwell or tired please do not force them to do home learning. Doing so often causes more harm than good. However, please let your child's teacher know via an email or their diary
- Communicate any thoughts or concerns that you may have with your child's teacher either via email or your child's diary

Parents as Partners

Parents are the prime educators of their children, therefore parents and teachers need to work together in the best interests of the child. At RISU we value the contribution parents make and we hope to work closely with you. Outside school, you can support your child by talking to them about what they have been learning at school and by sharing in their home learning.

At the start of each IPC unit, it will benefit your child if you talk about what the children will be learning (this is communicated to you through the IPC unit letter). This could be done either in English or your home language.

Staff are always happy to meet with you to answer questions and to discuss the progress of your child/ren throughout the year. Feel free to send questions or ideas to us; we are always willing to listen. If anything arises concerning your child, please talk to us... if it is on your mind then it is important to us.

As you will appreciate, because of our teaching and supervision commitments, staff are not always immediately available to meet in person. To ensure that a staff member is able to see you, please either telephone, email the staff member or write to the teacher in question, to arrange a suitable appointment.

We hope your child has a happy and successful year in Year 1.
